

# **7-21-7**

## ***Fluid Starter Fertilizer***

### ***For 2x2 placement***

Density: 10.91 lbs. per gallon

#### Characteristics

- High Polyphosphate base
- Clear green liquid product
- Potassium chloride source for K

#### Placement

- 7-21-7 should be placed at 2x2 or 2x0
- It is not recommended for in-furrow placement since it is not a low - salt formulation

#### Application Rates

9 gallons/acre (100 lbs.) applies actual plant food of  
7(N)-21(P)-7(K) per acre

14 gallons/acre (153 lbs) applies actual plant food of  
10.7(N)-32(P)-10.07(K) per acre

NOTE: Before blending 7-21-7 with UAN solution, consult with manufacturer for proper guidelines to avoid salting out.
